

Whaller

Communicate and collaborate
in complete security

[Classification : public | TLP:WHITE]

Whaller: Communicate and collaborate in complete security

Deploy a comprehensive social and collaboration platform.

From a collaborative intranet to a corporate social network, Whaller gives organizations everything they need to accelerate their digital transformation, without sacrificing cybersecurity. Whaller is ideal for both small teams and very large networks.

🇫🇷🇪🇺 Whaller DONJON is the first collaborative platform to be awarded the SecNumCloud Security Visa by ANSSI.

Whaller: Communicate and collaborate in complete security

🗨️ Communicate...

From a simple messenger to a corporate social network, Whaller is above all, a solution for both internal and external (clients, partners, etc.) communication.

🤝 ... and Collaborate...

File box, co-editing, events, tasks, video and audio conferencing, webinars...Whaller has all the collaboration tools you need to simplify teamwork whether remote or onsite.

🔒 ... in complete security

Every dimension of security is integrated into the Whaller platform (cybersecurity, legal, design).

Built with Privacy by Design, Whaller protects your sensitive and strategic data.

About Whaller

Founded in 2013 by Thomas Fauré, Whaller is a French platform for secure social and collaborative networking.

For 5 years, Whaller was a subsidiary of the Bolloré Group. In June 2018, we became independent.

We strive to bring out sovereign and independent solutions to offer strong leaders against GAFAM and BATX.

In August 2024, Whaller DONJON became the first collaborative platform to obtain the ANSSI Security Visa for SecNumCloud qualification.

Key figures:

- 20+ employees
- 1,000,000 users
- 200+ customers,
- + 10 experiments
- 1 deployment per day

 About Whaller

Our solutions

Our solutions cover your internal or external collaboration and communication needs, and are designed to evolve with you. Start with a small community, then expand your network's membership and features.

Efficient and simple, Whaller accompanies your organization's digital transformation every step of the way.

🗨 Social network

Create your own private or public social network with an unlimited number of distinct spaces and communities.

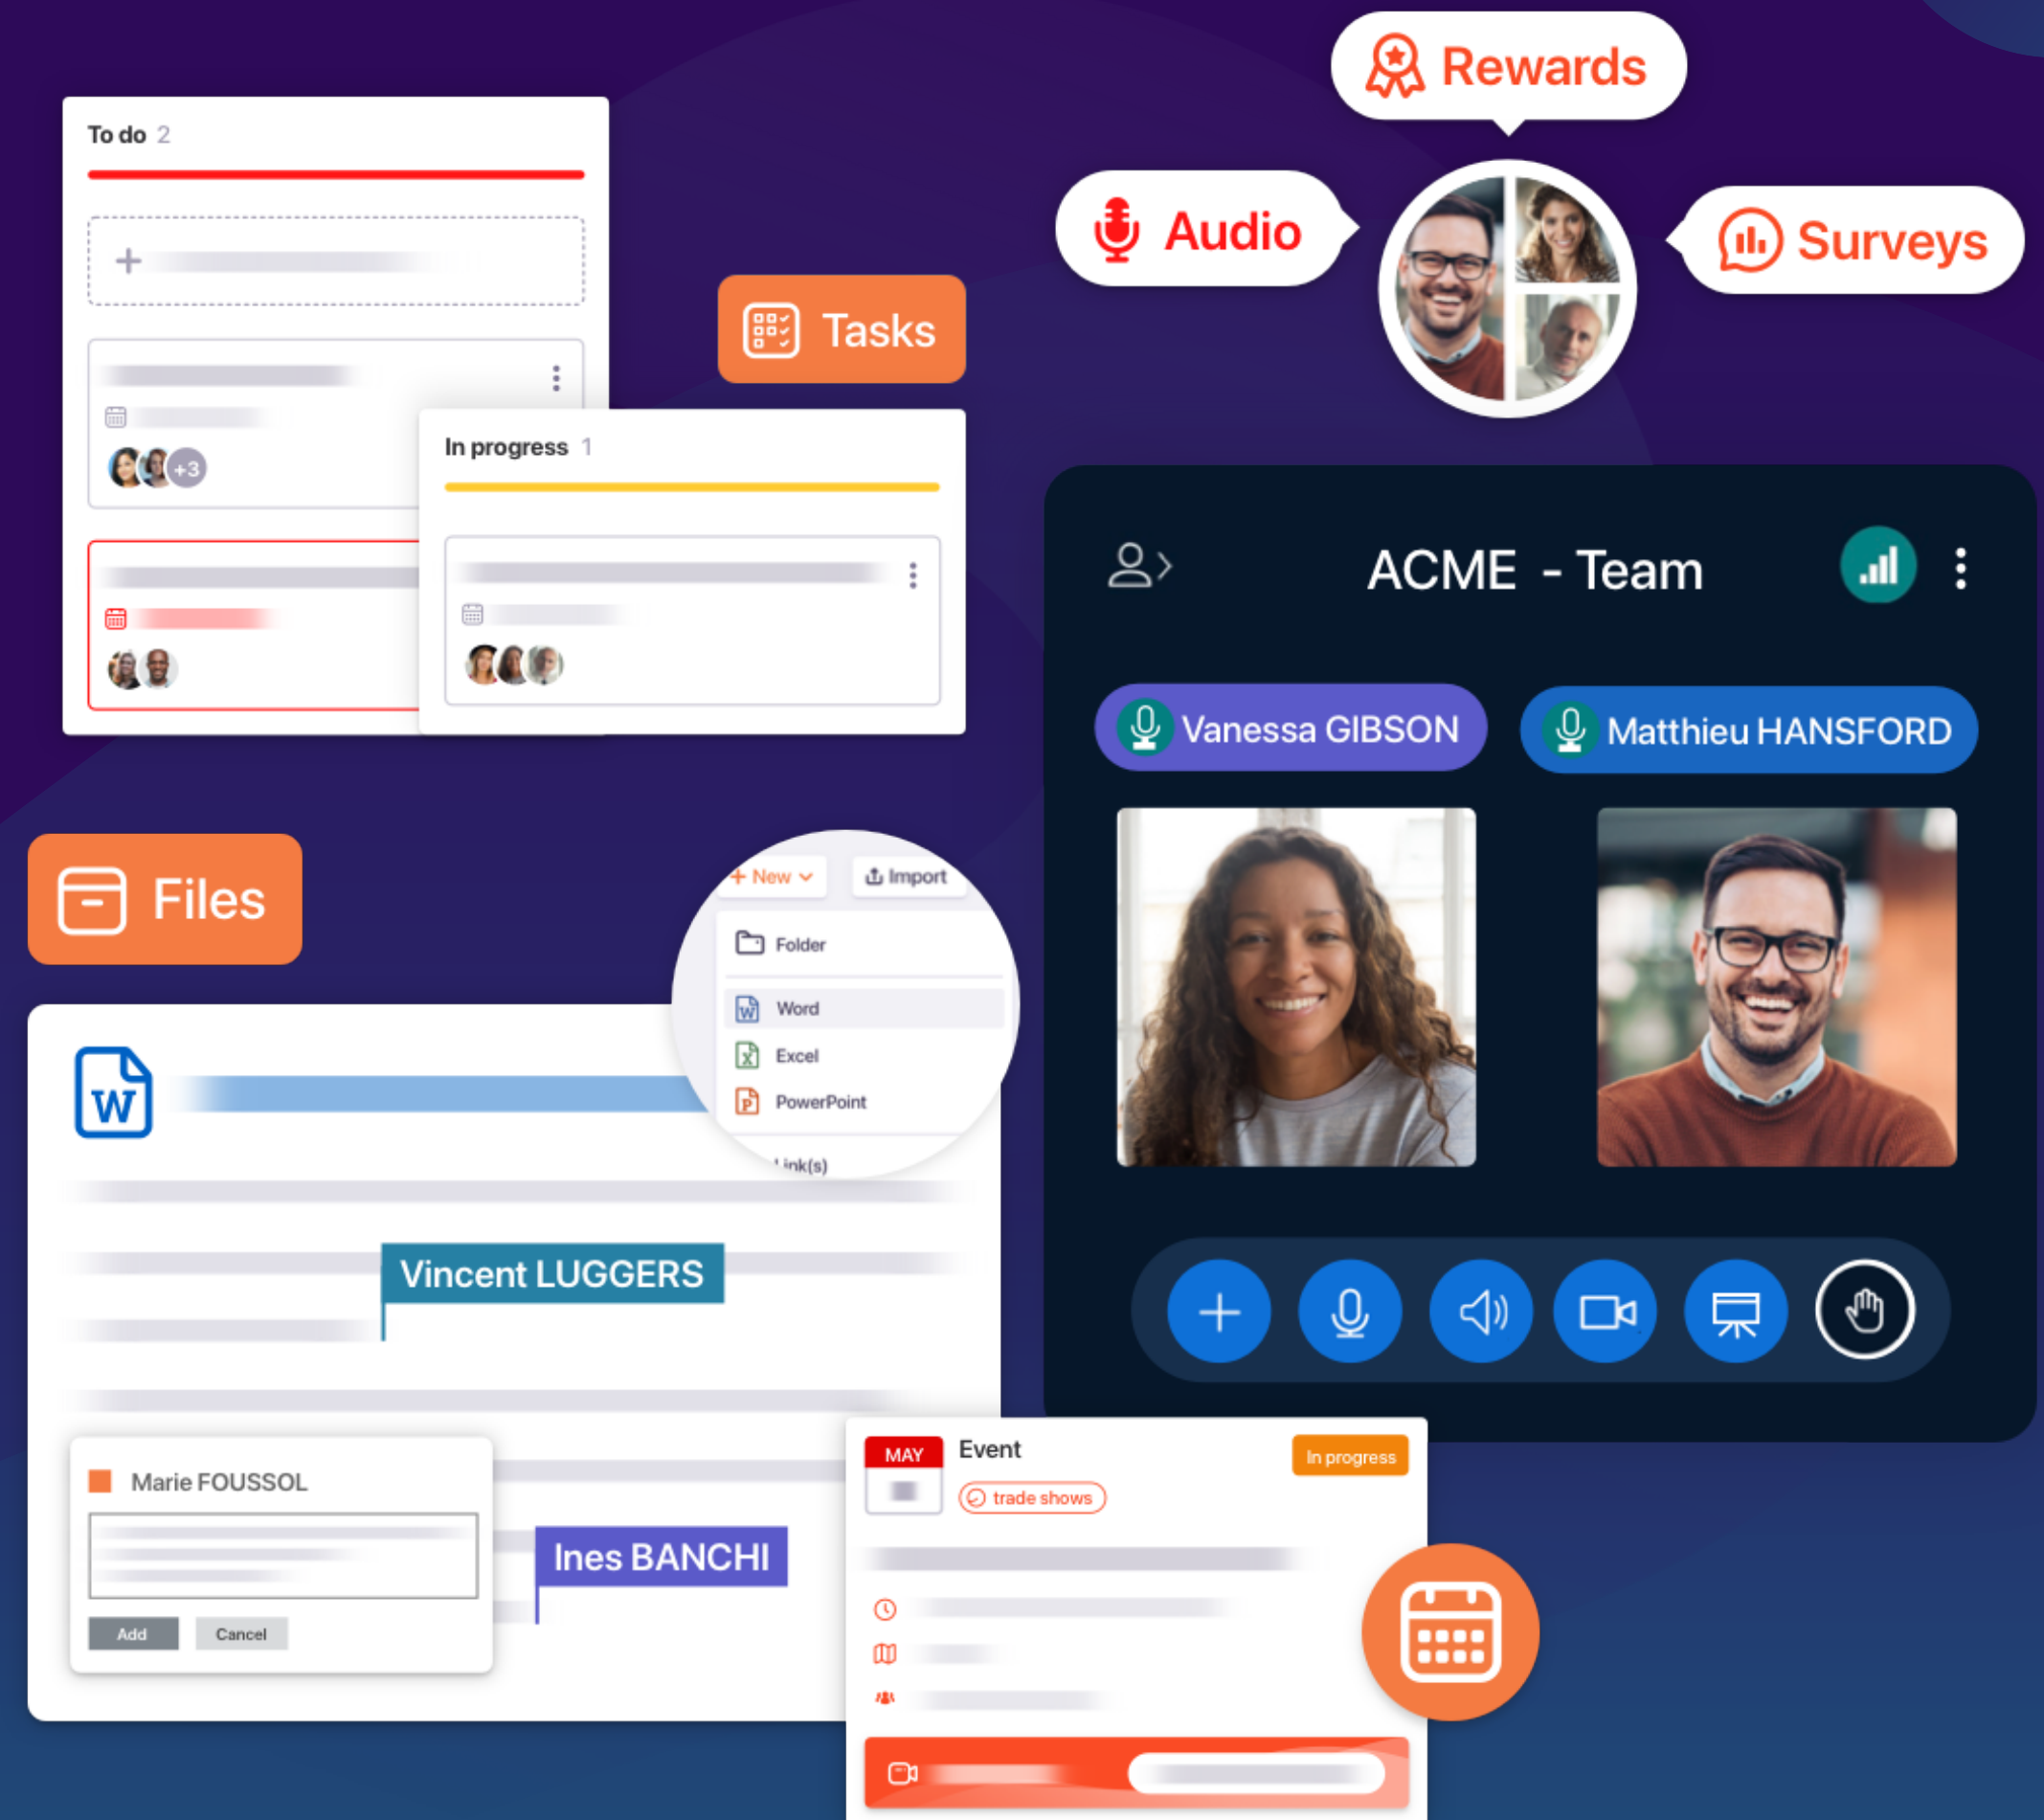

Collaboration platform

Each sphere includes a complete collaboration toolkit:

Online meetings, task management and Kanban, file storage, co-editing compatible with Microsoft Office, events and calendars, messaging, surveys, ads.

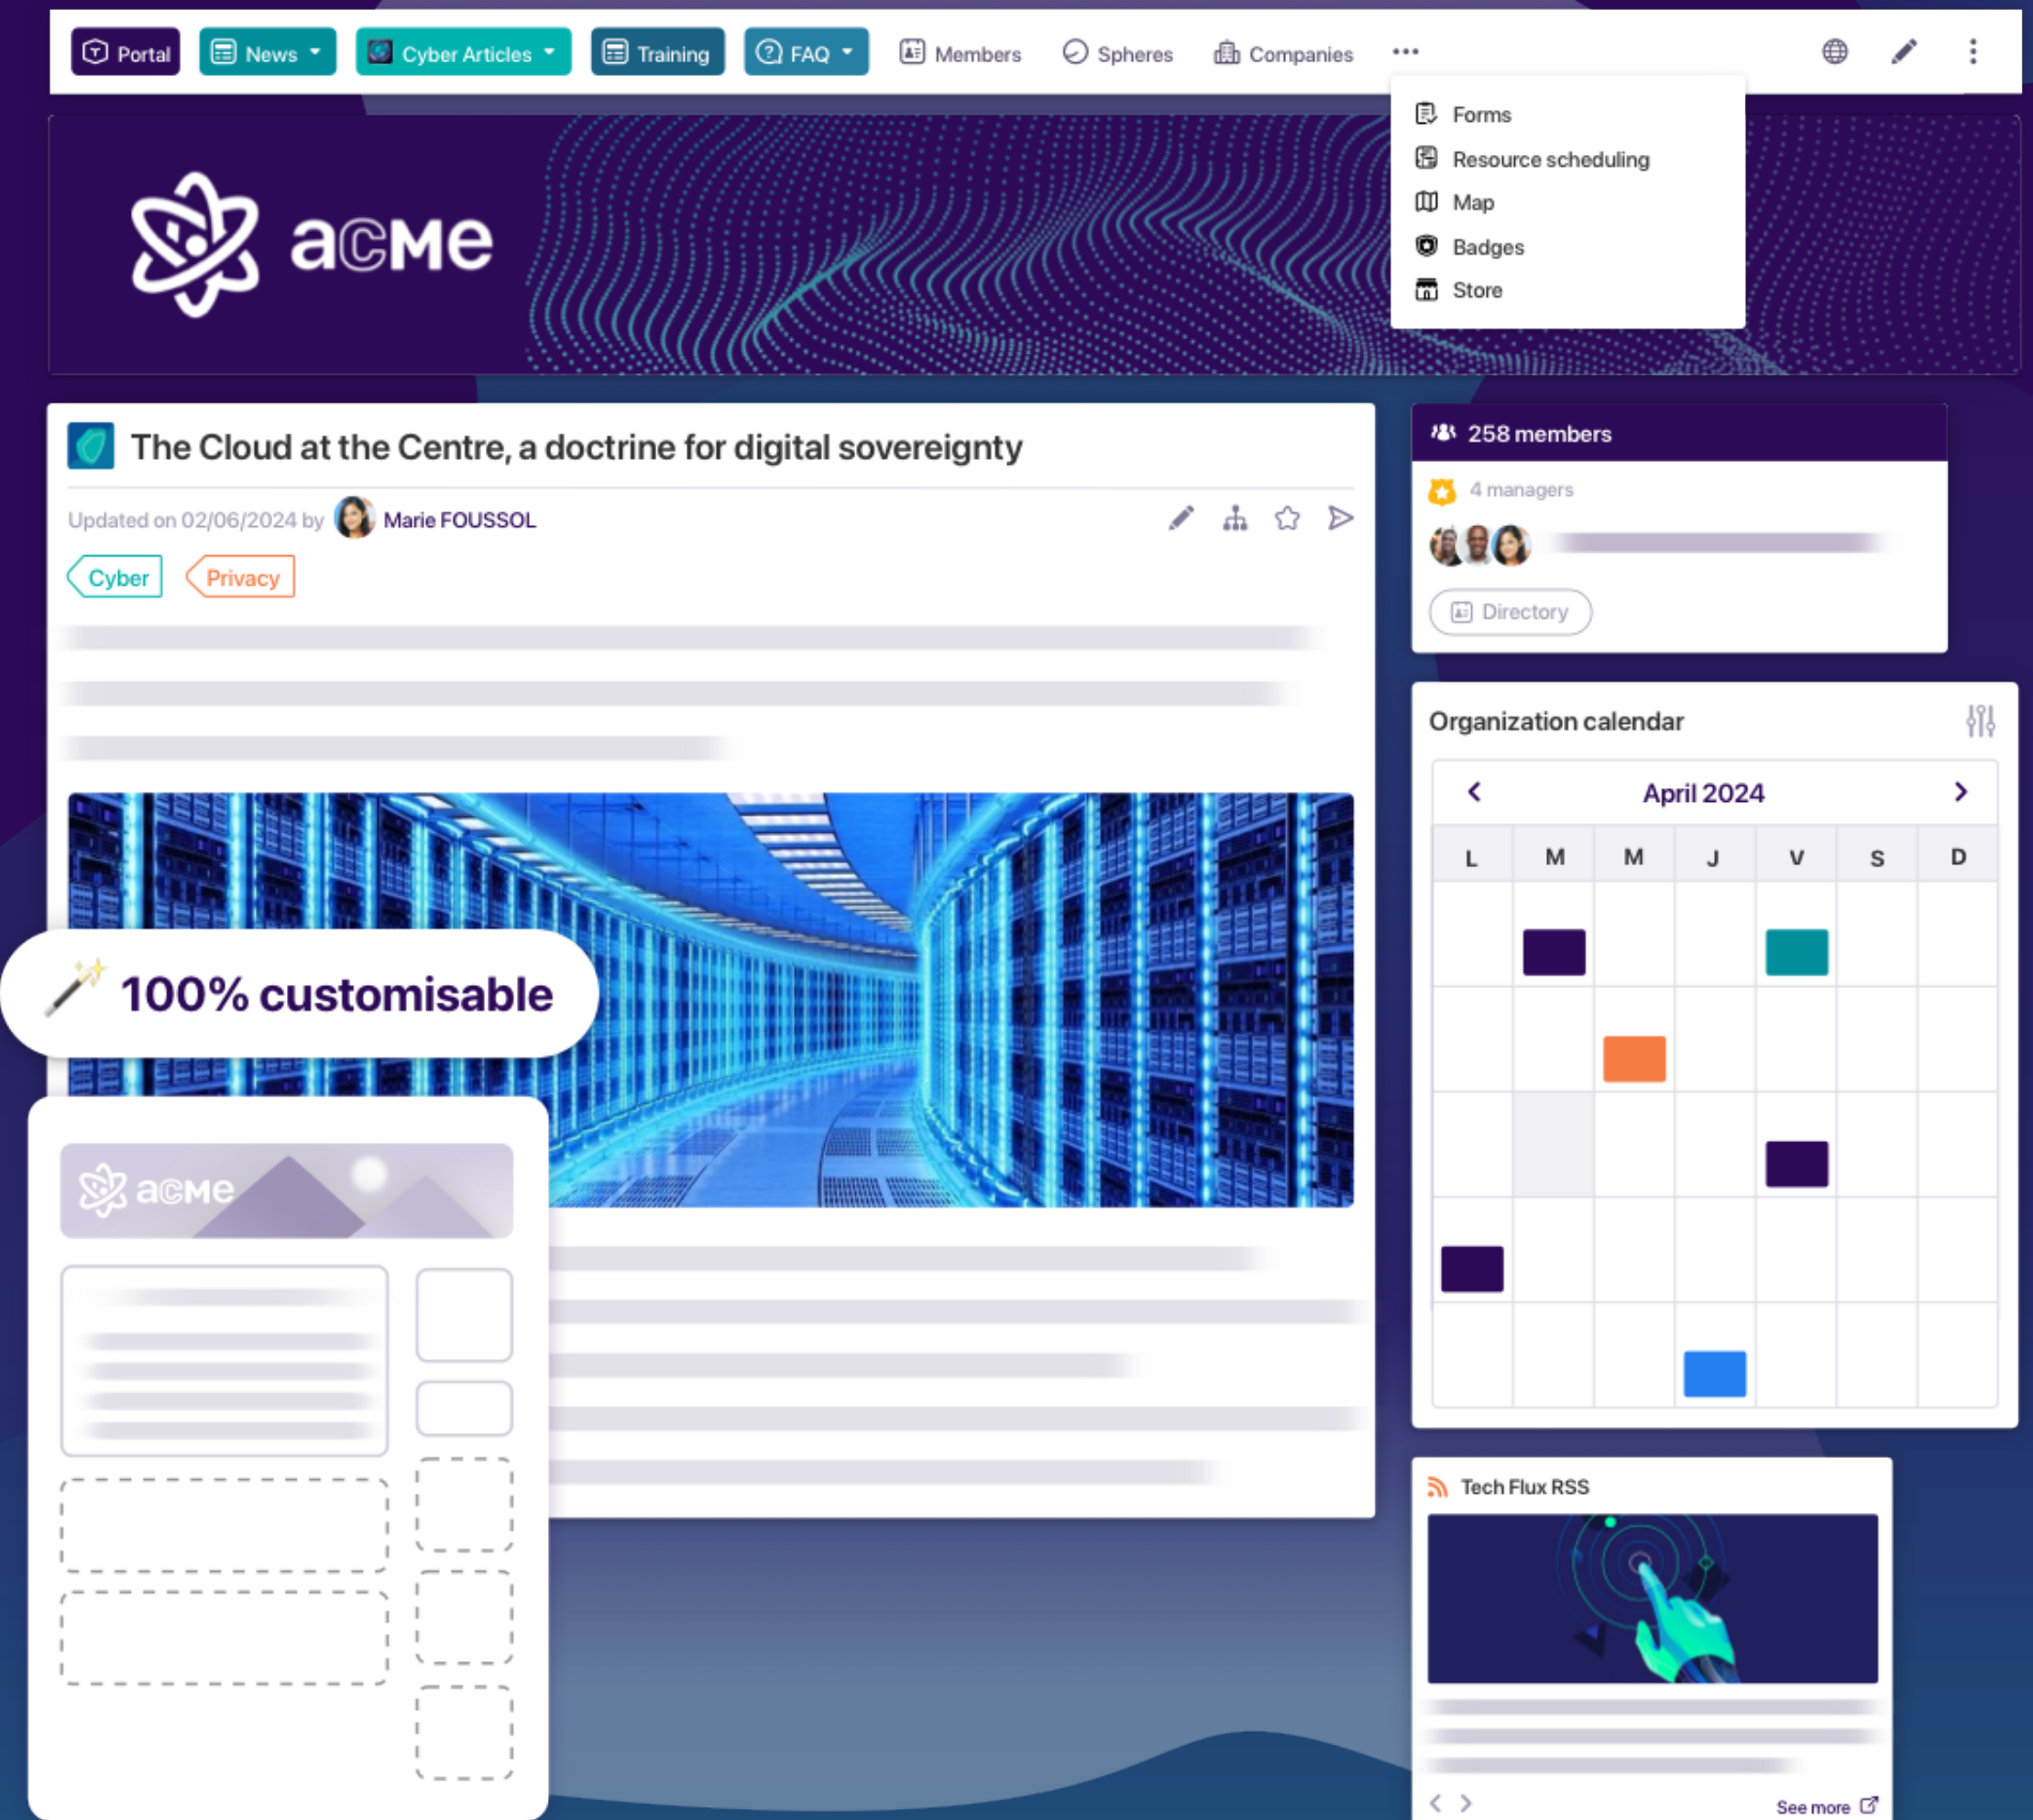

Whaller gives you all the tools you need!

🚀 Intranet and public portal

Build a modern and totally customizable intranet or extranet.

An ever-growing library of widgets and a complete CMS make it easier than ever to create a portal in your image.

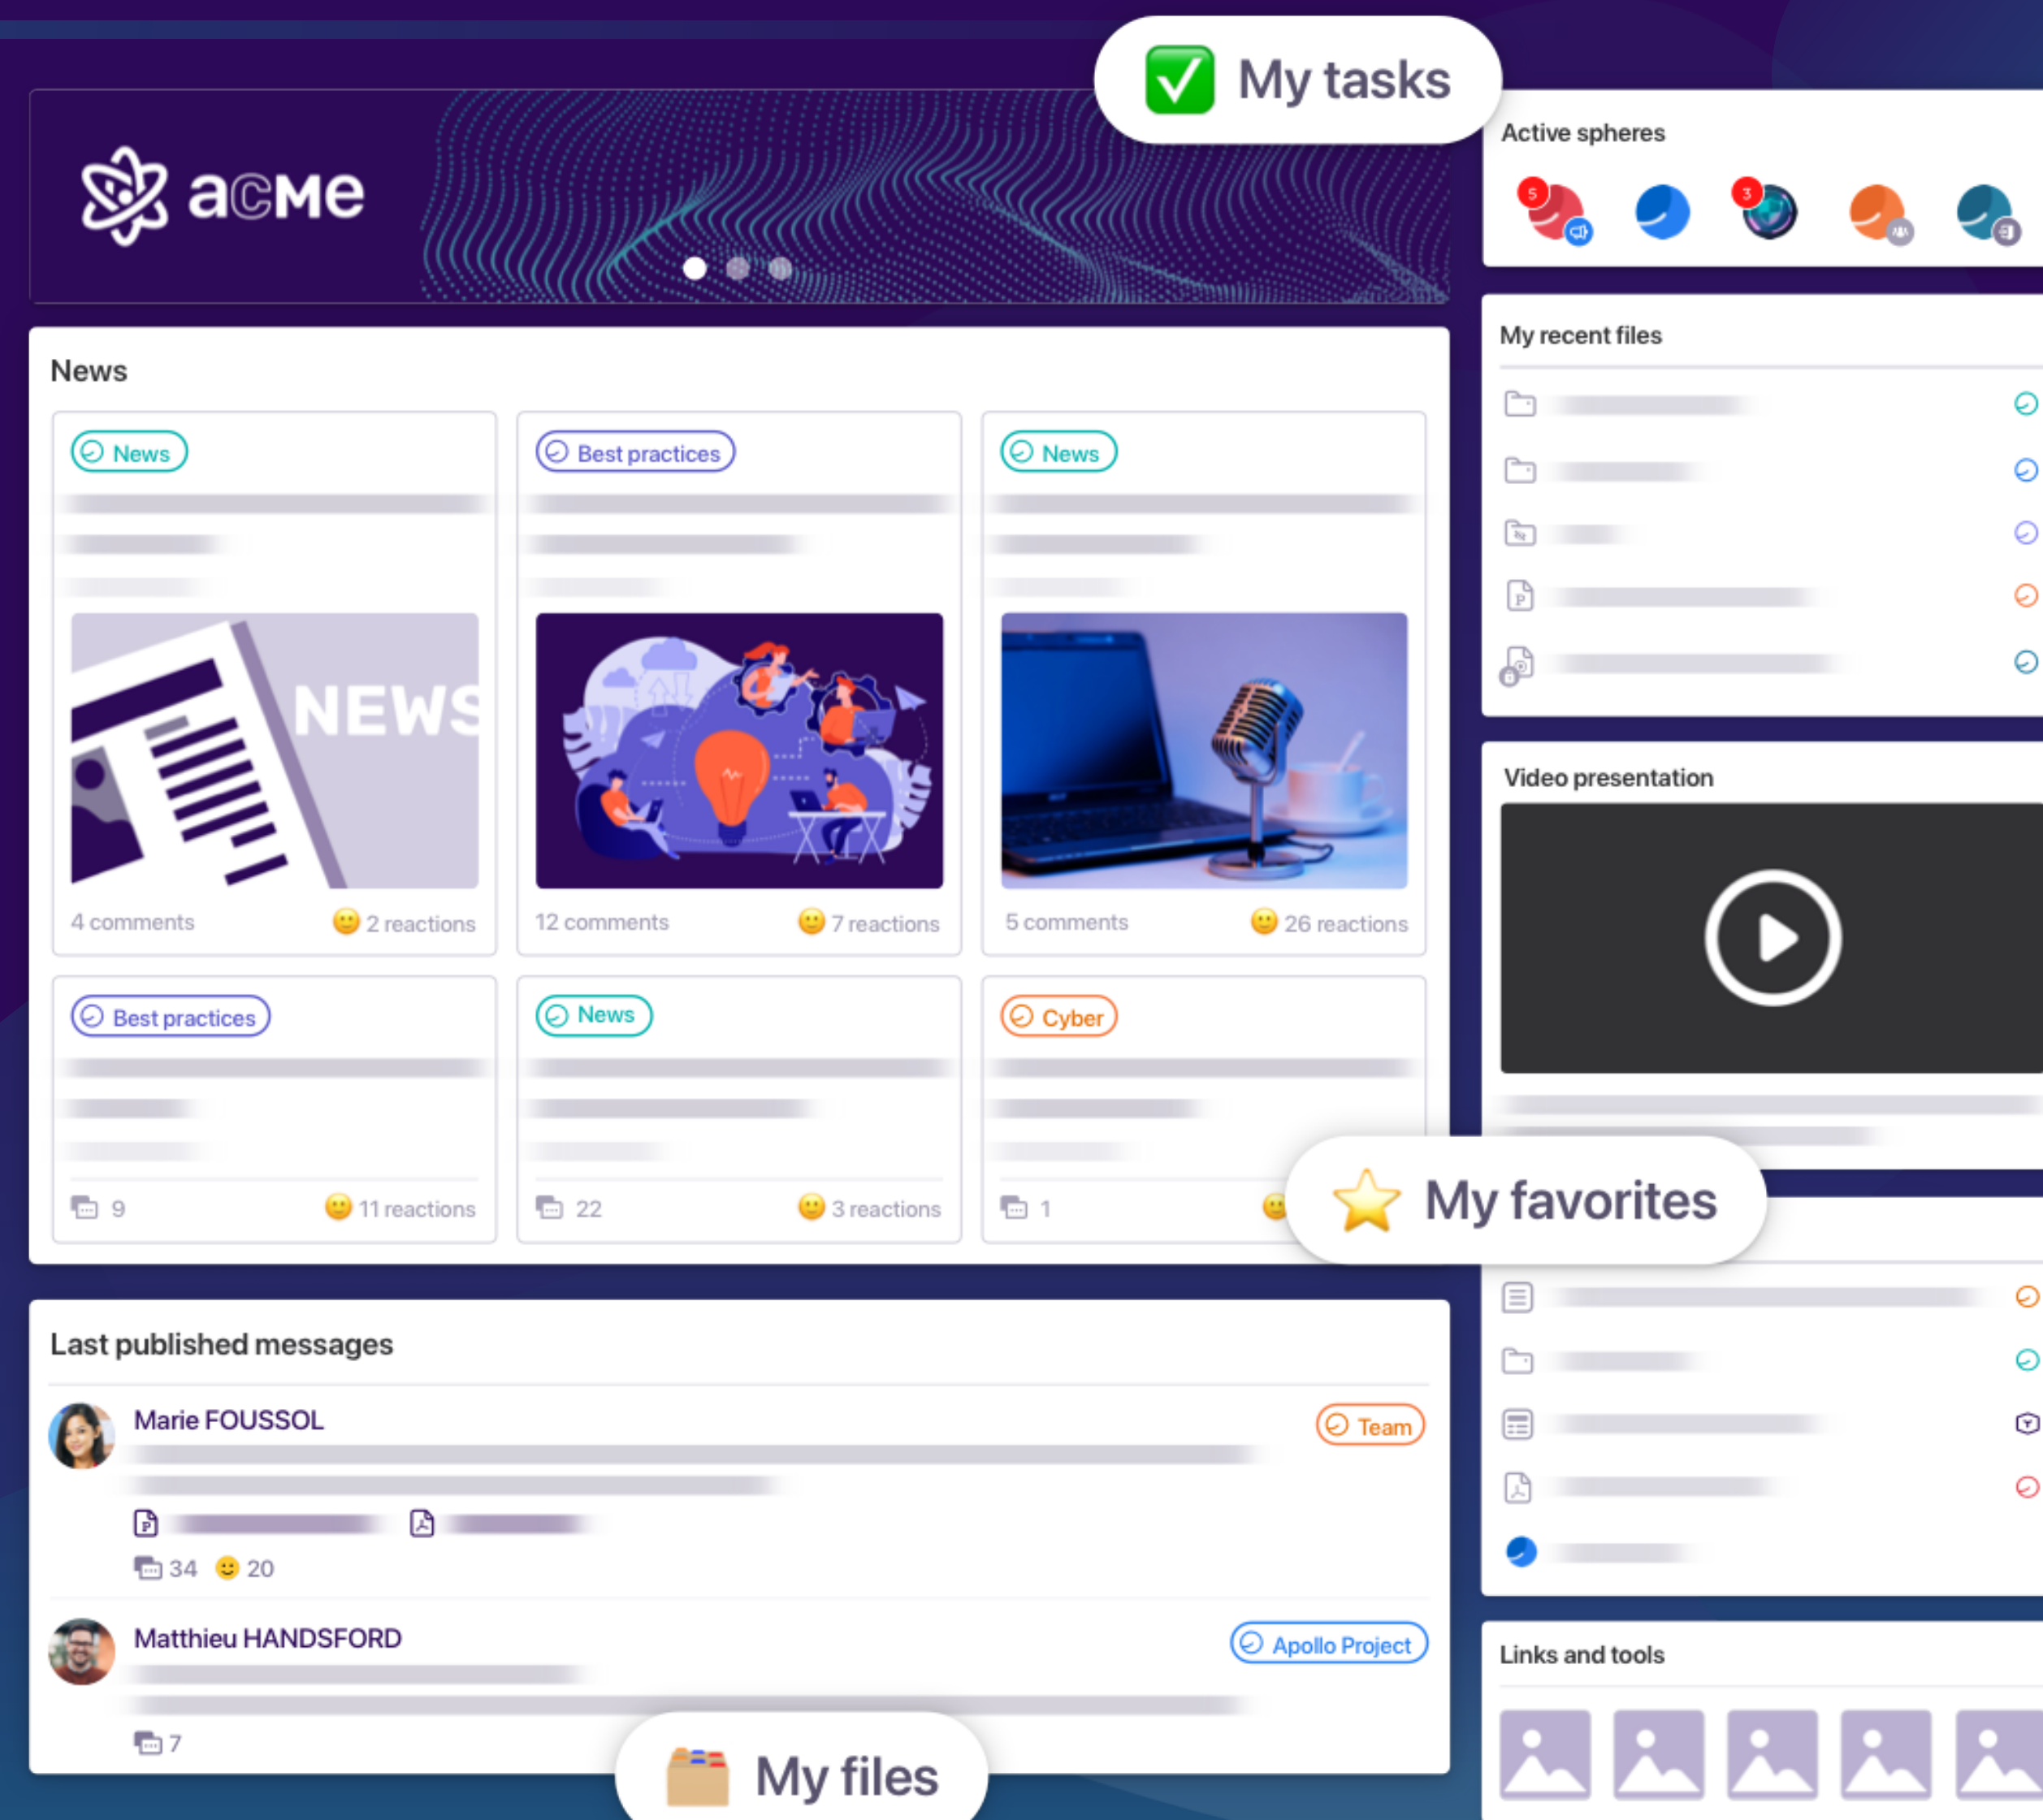

Digital workplace

Benefit from a multi-organization platform that can accommodate thousands of users, with a white label version that can be integrated into your IS.

Enhance employee experience with personal summary pages that allow network members to manage their daily lives without mental overload or confusion.

Why Whaller?

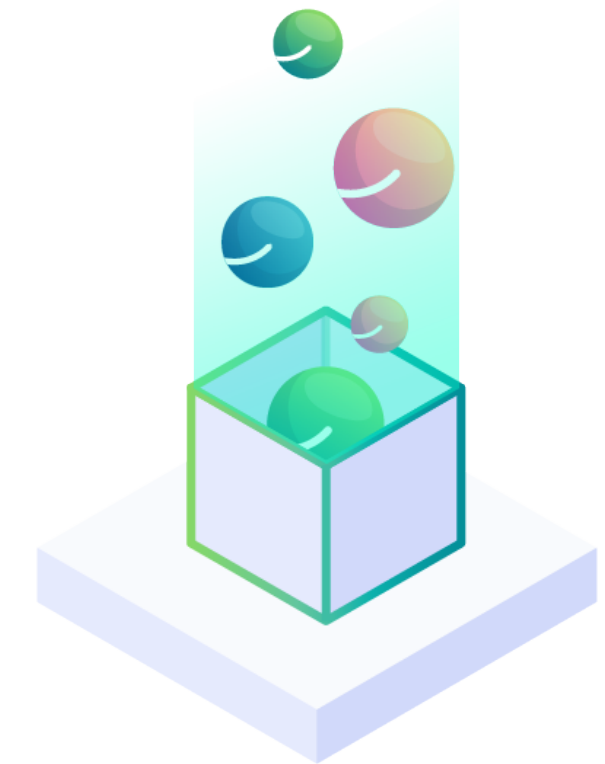

Security

- Your data truly belongs to you.
- The highest standards of **cybersecurity** are applied.
- “Spheres” (discussion spaces) are independent and **sealed**.
- Your data will **never** be exploited.

Simplicity (UX)

- Interfaces are **clear** and **intuitive**.
- All messages have context: **spheres**.
- You **always** know who can read your messages.
- You can **permanently delete** everything at any time.

Productivity

- Emails and notifications are reduced.
- Newsfeeds are clearly separated.
- There are no outside solicitations.
- **Concentration** is encouraged.

Whaller stands out

Focus on cybersecurity

Whaller is focusing on cybersecurity, as evidenced by the appointment of its Director of Cybersecurity 2022, Cyril Bras.

Cyril is also Vice President of Hexatrust.

*« Cybersecurity must now be integrated into all serious digital offerings. At Whaller, cybersecurity is at the heart of our strategy. It enables us to guarantee our customers and users state-of-the-art protection for their data. The **SecNumCloud** qualification of our **Whaller DONJON** solution reflects our commitment to France's digital sovereignty strategy and our active role in the national **cybersecurity** ecosystem. »*

Labels and certificates

SecNumCloud qualification

Whaller DONJON is the first collaborative platform to be awarded the SecNumCloud security qualification by ANSSI. This qualification underlines our commitment to data protection on our social and collaborative platform.

Used by the French armies

Since 2019, Whaller has equipped the Ministry of the Armed Forces, and was awarded the label "Used by the French Armed Forces" in 2021. In 2020, during the first lockdowns, Whaller was chosen to equip the entire Ministry as a temporary teleworking solution.

First sovereign solution to earn Privacy Tech label

Whaller is the first company to be awarded the "Sovereign Solution" label by the Privacy Tech association. The label, created in partnership with AFNOR certification, includes 5 categories and is aimed at French BtoB and BtoC software publishers.

UBCYBER label from Swiss agency UBCOM

On 19/11/2020, UBCOM announces that it has selected and labelled the solution developed by the French startup Whaller, leader in secure social and collaborative solutions. This decision was taken as part of UBCOM's research and selection process for cybersecurity offers.

ANSSI security approval for SecNumCloud qualification

Whaller DONJON, the first collaborative platform to receive the ANSSI's SecNumCloud Security Visa.

This qualification, awarded by the Agence Nationale de la Sécurité des Systèmes d'Information (ANSSI), confirms our commitment to exemplary security and compliance in cloud computing. It reinforces our position as a trusted leader in the collaborative platform sector and underlines our role in strengthening France's technological sovereignty.

🏆 1st company awarded the “Sovereign Solution” seal

Whaller is the first company to have been awarded the “Sovereign Solution” seal from Privacy Tech.

Created in partnership with AFNOR Certification (French Standardization Association), the seal includes 5 categories and is aimed at French B2B and B2C software publishers who place the utmost importance on data protection.

A trusted European cloud offer

Whaller has teamed up with OVHcloud to create a 100% European cloud offer.

In the context of the “Cloud de confiance” (trusted cloud) strategy driven by the French government, associated with ANSSI’s SecNumCloud requirement, we have seen the emergence of two so-called trusted offers supported by alliances between Orange-Microsoft and Thales-Google.

Whaller, in partnership with OVHcloud, is a 100% French, European alternative.

N°1 French solution in UX and ergonomics

UX is the number one success factor in digital transformation.

In 2021, Lecko rated around 100 collaboration solutions on user experience. Whaller scored 63%, placing it ahead of Microsoft 365, Confluence and all other French solutions. As a comparison, Workplace from Meta scored 68%.

Distinction from the American giants

Whaller is one of the few French platforms to stand out from the American web giants, proving its robustness and market relevance.

"Whaller is gradually carving out a place of choice in the ecosystem. The platform reconciles functional maturity and relevant positioning, while animating a growing community of "faithful", an asset for its development." Cabinet Lecko

✨ The most unified solution on the market, thanks to spheres

Over the past few years, many collaboration platforms have expanded their features, often copying each other, presenting full application stores that resemble other well-known solutions.

This accumulation of features rarely means "easy to use".

Whaller has remained consistent in its evolution. The platform has always been designed around the concept of sealed "spheres" and hyper contextualization.

Today Whaller is the most unified solution on the market. It remains loyal to its first intuitions, oriented toward **better protection and simplicity of use.**

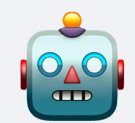

The only solution that's perfect for both small and large teams

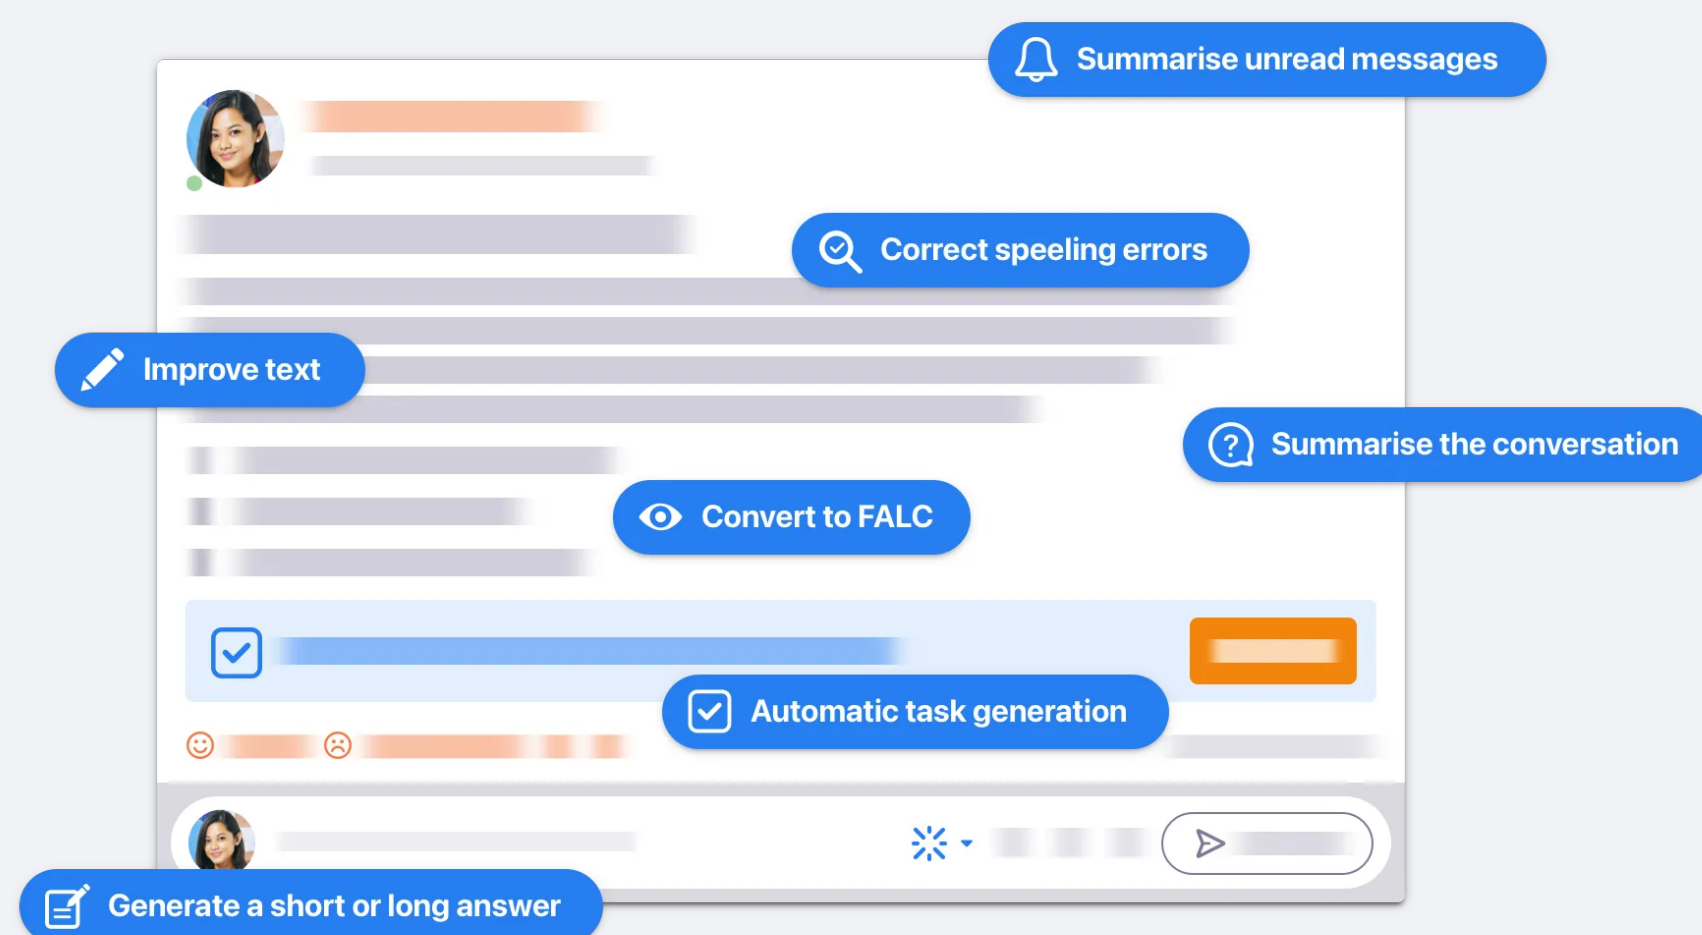

With its system of "spheres", Whaller can meet the needs of small teams collaborating on a daily basis, as well as very large networks, with many entities.

Whaller's architecture is designed around "spheres" (secure spaces for communication and collaboration), "organizations" (intranet portals) and "federations" (multi-entity workplaces) that allow for natural growth.

Whaller is one of a kind when it comes to flexibility.

Whaller (IA)ssistant: generative AI at the heart of Whaller

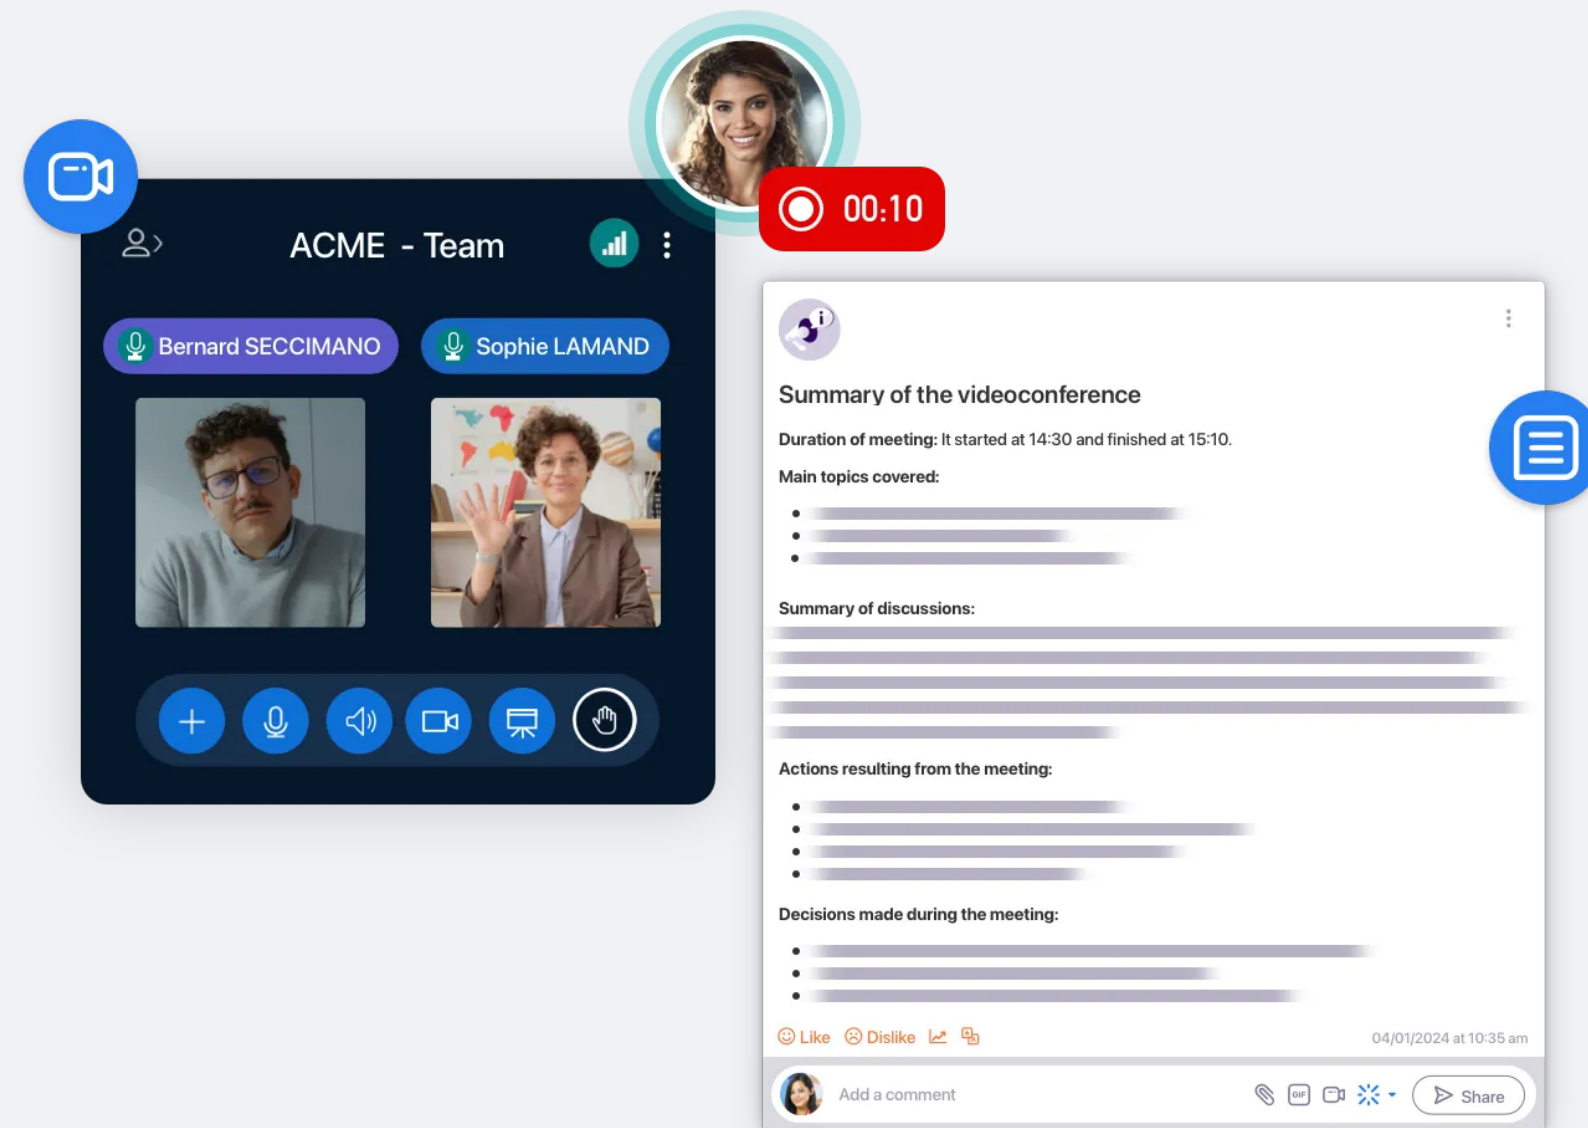

Automatically generate tasks for increased efficiency, **correct** and **improve** your texts for easier writing, **summarise** your discussions for smooth communication, and **adapt** your texts for maximum **accessibility** (***FALC**).

Choose 100% **French services**, with innovation aligned with **digital sovereignty**. Host your data with **Mistral AI** or **OVHcloud** for complete control over your information.

Enjoy **enhanced security** with our platform designed with 'Security by Design'. Whaller (AI)ssistant provides complete confidence to organisation managers, users and administrators.

***FALC** (Easy to Read and Understand) is a simplified writing method that aims to make information accessible to everyone, particularly people with mental or cognitive disabilities. It is based on specific rules for vocabulary, grammar and layout to facilitate comprehension and reader autonomy.

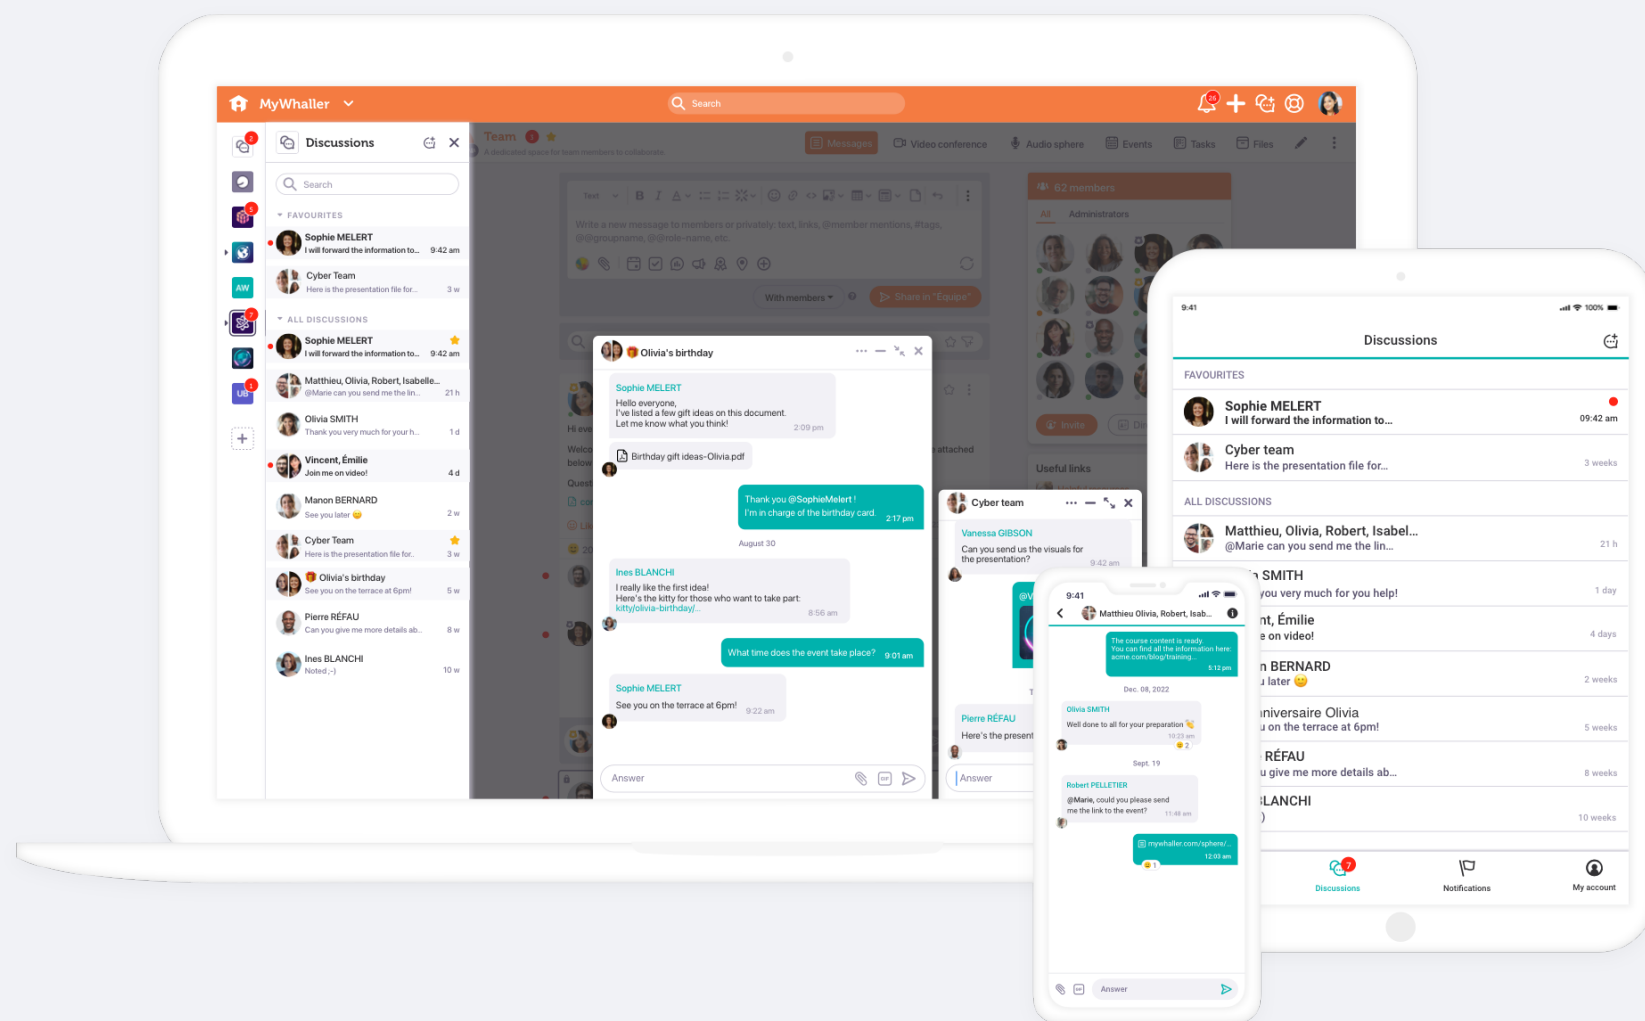

Aristote: your assistant for automatic reporting

Whaller integrates **Aristote**, an artificial intelligence developed by **CentraleSupélec**, dedicated to creating **automatic reports**. Thanks to Aristote, your meetings and discussions are **summarised** in real time, allowing you to save valuable time and focus on what matters most.

This new feature complements our suite of collaborative tools, reinforcing our commitment to providing a comprehensive and intuitive platform for managing your projects and communications.

Discussions, your instant messaging

Start private conversations with a single click thanks to a user-friendly and intuitive interface. Easily manage your exchanges with an organised sidebar and integrated notifications.

Customise your messaging experience with advanced options such as marking your favourite exchanges, quick member viewing and the ability to rename your discussions.

Enjoy maximum flexibility with Discussions, available on the web and mobile, and compatible with the open-source 'JABBER' protocol for optimal connectivity with other messaging clients.

Our users speak about us

« Whaller, a PRIVATE networking platform! »

♥ They trust us ...

Christopher Apédo-Amah

Startup Program Manager OVHcloud, in charge of the mentoring program

« Mentoring is a very specific project. Our aim is really to help startups with a particular challenge, a problem they're facing in developing their business, with an OVHcloud mentor with business expertise. In this respect, we were really looking for a platform that could save us time, an all-in-one platform that could automate certain functions. »

Nicolas François

Head of Lab Innov'Apec

« For many years, we had been convinced that we needed to bring our customers together in a private, secure space. We needed them to be able to talk to each other after our individual or group consulting services. At the time, we were tinkering with forums without being able to assure users that what they were saying was protected. Whaller's promise of security was a major factor in our choice. »

♥ They trust us ...

Laetitia Roggero

Director of Communications at the Université de Technologie de Troyes en Champagne / Head of Communications for the European University of Technology (EUT+) initiative

« Firstly, it's really the tailor-made, customer service aspect. There was a real exchange of ideas, and support in setting up all our working groups, since this is a European project with a huge number of working groups on a wide variety of themes. This gave us the flexibility to organize our work.»

Nina Näsman

Community, Platform and Social Network Manager, AGORA, EIT Manufacturing

« What I really like about Whaller is its human-scale approach. The team is easily accessible for all our questions, technical bugs and improvements, gestures we may have. We really appreciate the collaborative approach Whaller takes to technical development, and we're pleased to also benefit from Whaller and other customers' investments in the platform. Over the past two years, since we've been managing the AGORA community, we've seen a lot of changes and improvements and it's growing with time. »
